

Welcome to my curriculum vitae.

I will try to introduce myself in a few words, share my universe and my personal vision. I am at the end of the upper cycle in product and service design management, currently looking for a graduate internship for a period of 6 months starting in March. I am passionate about technology and audio, although versatile I would like to orient myself in these environments.

If I had to define myself, I would say that I am **passionate** about what I do. When I start something I commit myself fully. I am **empathic**, that is an asset to understanding a target, always try to give as much help as possible to others, which in my opinion is part of the work of a designer. Finally I would qualify as **Atypical** in my way of thinking, I like to leave the paths traced and in spite of my open-mindedness, I still respect the values which are my own.
